Bugs

LADYBUG

Most ladybugs are red with black spots.

spots

Ladybugs have wings and can fly.

Can you point to the ladybug's wings?

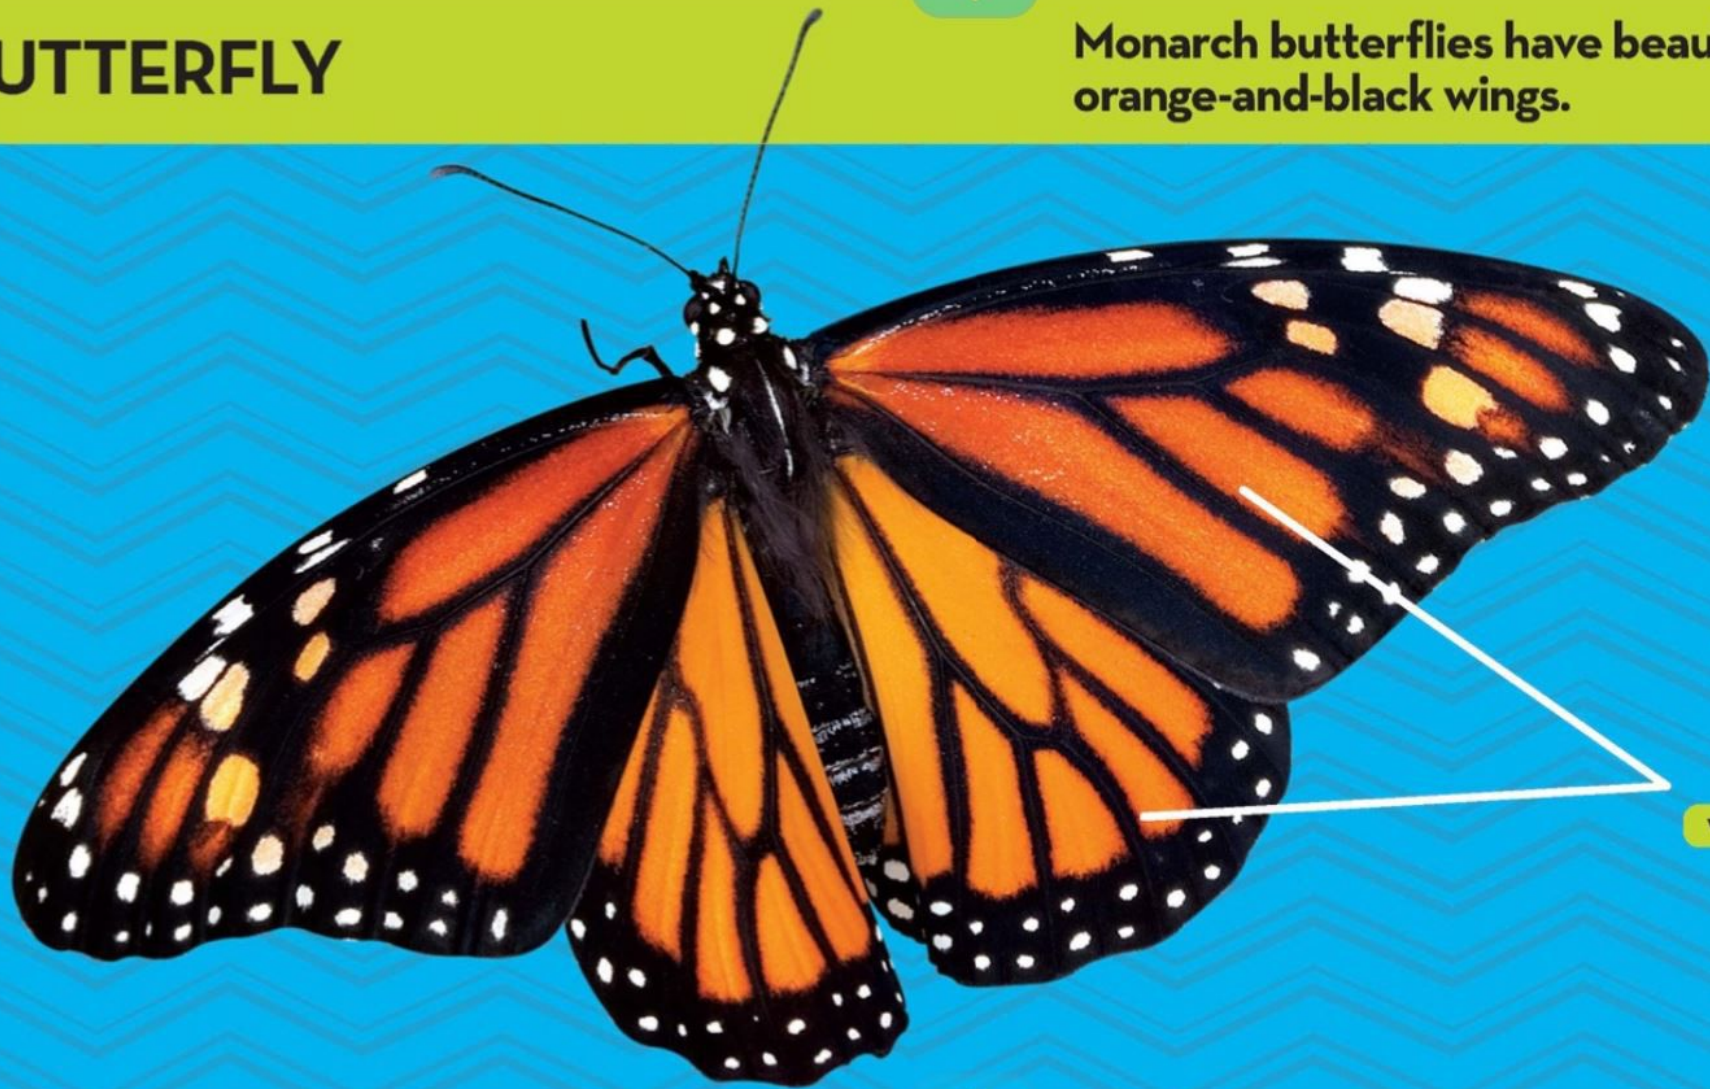

**GUESS
WHAT?**

Ladybugs
are also known
as lady beetles
or ladybird
beetles.

BUTTERFLY

Monarch butterflies have beautiful orange-and-black wings.

wings

Monarch butterflies sip nectar,
a sweet juice in flowers.

How many butterflies do you see?

**GUESS
WHAT?**

Monarch
butterflies hide
under leaves to
stay dry when
it rains.

BUMBLEBEE

Bumblebees are round and fuzzy.
They have black and yellow stripes.

stripes

Bumblebees fly from flower to flower to find nectar.

But watch out! They can sting.

**GUESS
WHAT?**

**A different
kind of bee, called
a honeybee,
makes honey.**

PRAYING MANTIS

A praying mantis folds its two long front legs. This makes it look like it is praying.

front legs

Gardeners like praying mantises.

**Praying mantises eat other bugs
that hurt plants.**

**GUESS
WHAT?**

**Praying
mantises can
see really well. This
helps them catch
other bugs.**

FIREFLY

Fireflies have a special body part that makes them light up.

**You can see fireflies in the evening
when the sun goes down.**

Can you catch a firefly?

A photograph of a forest at night, illuminated by the soft glow of numerous fireflies. The trees are dark, and the ground is covered in green foliage and yellow wildflowers. The fireflies appear as small, bright yellow-green lights scattered throughout the scene.

**GUESS
WHAT?**

**Fireflies
are also called
lightning bugs.**

Look at all the different bugs! Can you name them all?
