

### Are dolphins mammals?

1 What's a mammal? Read the text and check if you were right.

Mammals are vertebrates. They've got a backbone. Most mammals can walk or swim. They drink their mother's milk and they breathe air with lungs. They've got warm blood. Most mammals live on land, like cows and sheep. They've got hair on their bodies. Some mammals live in the sea, like sea lions and whales. They haven't got hair on their skin. The only mammal that can fly is a bat.

2 How do we know that a dolphin is a mammal? Use this key to find out. Write the animal names in the boxes.

- tiger bat spider shark crocodile eagle frog bee dolphin
