

## Exam task

For questions 1 – 6, choose the answer (a, b, c, or d) which you think fits best according to the text.

- Which statement about Tut is NOT true?
  - He lived till the age of nineteen.
  - His tomb was discovered in 1922.
  - New evidence about him has recently come to light.
  - His family ruled for centuries after his death.
- In 1968, it was discovered that
  - some bones in Tut's chest were missing.
  - Tut wasn't murdered.
  - Tut fought in many wars.
  - some bones in Tut's chest were fractured.
- What was NOT first discovered in 2005?
  - the damage to Tut's skull
  - Tut's height
  - the condition of his teeth
  - that he appeared to be disease-free
- How many times has a CT scan been carried out on Tut's mummy?
  - once
  - twice
  - three times
  - four times
- What relation was queen Tiye to Tut?
  - his daughter
  - his wife
  - his grandmother
  - his great-grandmother

### Identifying what a word refers to

- Remember that when you are asked a multiple-choice question about what a word refers to, the answer usually comes before the word in the text.
  - Look back in the text and find which word(s) you think it refers to, then try reading the sentence using the word(s) to see if it makes sense.
- What does the word *which* in the last paragraph refer to?
    - Tut's family
    - Tut's health problems
    - Tut's marriage
    - our knowledge of Tut
