Rules at school/at the zoo

Mingle 3 True Rules, Three False Rules

- Get students into project groups. - Give each group an A3 piece of paper
- Get students to pick a problem out of a hat. (air pollution, water pollution, crime, traffic, food hygiene)
- Give them 5 minutes to find as much info about that problem as possible and add it to their brainstorm. After 5 minutes, CHANGE! Group gets new topic, and has 10 minutes to find out as much info as possible about that. (Keep changing etc)
- End of lesson. Each group must tell the class about one type of safety problem. (OR put posters around the room for everyone to look at).
