## Clothes & Accessories

In this educational board game, students match words with drawings of clothes and accessories.

Before class, make one copy of the board and cards for each pair of students. Cut the cards as indicated.

### Procedure

Split the class into pairs (A and B).

Give each pair a copy of the board and a set of cards. Tell them to place the cards face down in a pile in front of them.

Students take it in turns to pick up a card. Then, they write the word on the card under the correct drawing. Students also write A or B after the word so they know who wrote it.

Tell the students not to tell their partner if they see that they have written the wrong word under a drawing because they are competing to get the highest score.

Students can write more than one word under each drawing, but only one will be correct when they check the answers at the end.

When the pairs have gone through all the cards, check the answers with the class.

Students score one point for each word they placed correctly and lose one point for each word that is in the wrong place.

The students add up their scores to see which student (A or B) won in each pair. Also, find out which student had the highest score in the class.
